SERIES SM
6 MODELS: 0 - 250 VDC To 0 - 3000 VDC

FEATURES:
- Low Cost / High Reliability
- Small (.98 Cubic Inch)
- PC Board Mounting
- Output Proportional To Input
- Operates On 12VDC (max)
- Input / Output Floating
- High Input / Output Isolation >3500 VDC
- Short Circuit and Reverse Polarity Protected

APPLICATIONS:
- Ink Jet Printers
- Photo Detectors
- Gas Chromatography
- CRT Focus & Bias
- Geiger Tubes
- Ionization Chambers
- Photomultiplier Tubes

DESCRIPTION:
The GAMMA "SM" Series provides a line of high voltage DC to DC converters. Their small size and PC Board mountability make them ideally suited for low current, high voltage applications.

Output voltage is proportional to the input voltage and is linear from approximately 10% to maximum output voltage. The high converter frequency allows the low output ripple to be further reduced by addition of an external output capacitance.

The floating output configuration enables the user to choose either positive or negative output.

Circuit topography permits these units to be customized to meet individual customer requirements.

ELECTRICAL CHARACTERISTICS:
- Input Voltage: 0 to 12 VDC
- Input Current: 95 mA (F.L.) Nominal
- Output Voltage: Proportional to Input (See Table)
- Output Current: See Table
- Load Regulation: 5% (1/4 load to full load)
- Ripple: <0.5% P-P
- Insulation Strength: >3500 VDC Input/Output

PHYSICAL CHARACTERISTICS:
- Dimensions: 1.26" x 1.25" x 0.53" (H)
- Volume: .96 cubic inch
- Weight: Approximately 1.5 oz.
- Packaging: Gold Encapsulation
- Terminations: 4pcs. (0.043 dia. holes)

ENVIRONMENTAL CHARACTERISTICS:
- Temperature Range: -20°C to +70°C
